

Dear suppliers,

ORGANISTRY is certified in the field of quality according to the UNE-EN ISO 9001 management standard since 2015.

On the occasion of the change of the standard in 2015, communication is required to all our suppliers of a series of requirements for the approval of the products and services received, the competence of the company and the supplier's personnel, interactions and control and monitoring the development of the supplier in compliance with all requirements, among others.

Therefore, ORGANISTRY informs all suppliers that all requirements will be included in the order form or attached documents from this moment. In the same way, the ORGANISTRY staff will proceed to review the product or service at the time of receipt of the same, at which time any incident may appear. Where appropriate, the supplier will be notified.

Thus, ORGANISTRY will assess the development of its suppliers based on the non-conformities opened in each year, and may be discontinued in the event that the requirements issued by ORGANISTRY are not repeatedly met.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Ángeles Conde'.

Ángeles Conde
